Pattanapong Plodrum

I'm a Frontend Developer who focuses on the intersection of clean code and high-conversion e-commerce. I don't just build layouts; I build storefronts that load fast and actually work. With deep experience in Shopify (Liquid) and Magento (Layout XML), I specialize in refactoring bloated themes into high-performing, accessible interfaces. My goal is simple: pixel-perfect UI that passes Core Web Vitals and drives sales.

Work Experience

Digital Marketing - Compass Hospitality

2022 - 2023

- Sending promotional emails, newsletters, or campaigns to customers or subscribers.
- Analyzing website traffic, campaign performance, and customer behavior using tools like Google Analytics.
- Promoting brands or products on social media platforms like Facebook, Instagram, TikTok, and LinkedIn for the Hotels in the chains

Website Administrator - Pacifica Group

2024 - Present

- **Custom Storefront Development Transform Figma** designs into pixel-perfect Shopify (Liquid) and Magento (Layout XML) themes.
- **Performance Optimize** page speed and Lighthouse scores through asset management and clean CSS architecture.
- **Responsive UI/UX Architect** fluid, mobile-first layouts that ensure a consistent experience across all devices.
- **Conversion Optimization Refactor Product Pages and Checkout** flows to reduce friction and drive measurable sales growth.
- **A11y & SEO Implementation Apply** semantic HTML and ARIA standards to boost search rankings and ensure site inclusivity.
